Forecast for Wednesday 26 Apr 2023

Weather: Dry much of the morning, but high cloud thickens to give an overcast day. A few light showers around midday and early afternoon. Dry late afternoon and evening with a chance of some brighter spells.

Chance of cloud-free hill tops above 800m: 80%

Low cloud and visibility: Generally very good visibility with cloud bases mostly above the summits. A chance that cloud bases may briefly drop onto the higher Fell tops between late morning and early afternoon, most likely near passing showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Note low freezing level and cold summit temperatures in the morning. Moderate UV levels despite cloud cover.

Forecast for Thursday 27 Apr 2023

Weather: Cloudy. Although currently looking largely dry, there will be a chance of light rain, sleet on the summits, at times through the day. This most likely across the northern Fells in the early hours and morning, then across the southern Fells in the afternoon and evening.

Maximum wind: Southeast 20-25 mph, easing to 15 mph in the evening.

Chance of cloud-free hill tops above 800m: 70%

Low cloud and visibility: Generally good visibility, with the cloud bases likely to be above the Fell tops most of the day, but a chance of lowering onto the higher summits at times, and perhaps some cloud down to 700m across southern Fells in the morning.

Temperature: **Valleys:** Plus 7 Celsius rising to 9 Celsius.
At 800m: Plus 1 Celsius rising to 5 Celsius.
Freezing level: 900-1000m, rising above the summits soon after dawn.
